

Dax Networks' new Ethernet Switch - Wednesday, 01 August, 2007, 17:07

Chennai: Dax Networks has launched DX-5048GSE, a high performance Layer 2 Managed Gigabit Ethernet Switch. DX-5048GSE offers IPv6 and comprehensive network management functions such as SNMP, RMON, and Standard CLI via console and web based management. Priced at Rs 1, 81,690, DX-5048GSE is targeted at mid-sized and large enterprises.

The Ethernet Switch provides IPv6, the specification for which has been designed with scalability and backward compatibility in mind. To enable customers to protect their networks and services from unauthorized access, the switch comes with multiple security algorithms such as Port Security, SSH, Web Management Encryption, RADIUS and TACACS+.
