

Dax launches DX-5749XGS

Dax Networks has launched DX-5749XGS, an ideal solution for high-bandwidth data-intensive applications. Priced at Rs.4, 11,370/-, it is a high-density 48-port Gigabit backbone multilayer switch with 10G expansion capabilities. This switch has advanced security features and is targeted at mid-size and large enterprises.

To secure high bandwidth, DX offers non-blocking 164Gbps switch capacity. It supports Layer 3 (L3) features like Static Routes, Multi-netting, Supernetting (CIDR), RIP I and II, OSPF Routing, IP Multicast Routing: DVMRP, PIM-DM/SM, IP Redundancy – VRRP, etc.

By virtue of its multiple security algorithms such as Port Security, SSL, Web Management Encryption, Radius and TACACS+, it delivers total protection from network security related risks. It supports NSMP, RMON, DHCP and BOOTP. It also supports advanced features including VLAN, Diffserv Traffic Prioritization 802.1p (QoS), Port Trunking, Spanning Tree and Port Mirroring. Configuration files can be loaded and saved for flexibility and reliability.

An L3 managed switch, DX-5749XGS has 48 10/100/1000 Base T ports, 4 Gigabit SFP combo ports, 2 10G Stacking ports and 1 10 Giga expansion slot.

DX-5749XGS comes with a 3-year carry-in warranty and online support to its customers. Dax plans to market this product through its system integrators and strong channel presence comprising 500 solution providers and 5,000 resellers
