

Dax's Nationwide Connectivity Project for CAMS

Dax Networks has executed a nationwide networking project for CAMS. Under this project, Dax's Routing solutions have been deployed across the country in over 140 Investor Service Centres of CAMS that are connected in real time to the back office in Chennai. Subashini Prabhakar, Chief Technology Manager, Dax Networks, said, "Following our highly structured pilot run, the implementation went through smoothly. We have multi service provider termination and hot standby option across 2 routers in each centre. CAMS is assured of 99.99% uptime and will be able maintain its SLA even in remote cities at a nominal cost."
