

IOLAN secure console servers

Dax Networks, in partnership with Perle, is launching IOLAN secure console servers (SCS). Priced at Rs. 1,23,880, the server comes with advanced security functionality to perform secure remote data center management and helps reduce costs and cut downtime. IOLAN SCS will enable administrators to securely access remote serial console ports on equipment such as private branch exchange (PBX), servers, routers, LAN switches, UPS, network storage equipment, and security appliances through an IP network. Delivering the highest level of reliability and performance in a 1U form factor, IOLAN SCS offer robust security, flexibility, and next generation IP technology, ideal for managing remote equipment via their serial console ports. Available in 8, 16, 32 and 48 port sizes, the IOLAN SCS series has the right fit for all the serial application needs.
