

## **e-Gov project by Dax and Srei**

**DQW NEWS BUREAU**  
Chennai, Feb 12

Dax Network has executed an e-Governance project for Srei Infrastructure, wherein Dax has networked 4,937 village kiosks in West Bengal through its partner. This project comes under the purview of Srei Sahaj e-Village, a subsidiary of Srei Infrastructure.

Srei Sahaj e-village is planning to set-up CSCs in Bihar, Uttar Pradesh, Tamil Nadu and Assam.

In line with the National e-Governance Plan (NeGP), Srei Sahaj e-village is setting up over 20,000 common service centres (CSCs) across the country, to bridge the digital divide between rural and urban India. A CSC is a village kiosk, a nodal point in a rural district that will serve as a delivery point of all technology-aided government services. Srei had chosen Dax Network's products to network its CSCs and the first phase of this project has been completed.

Commenting on the project, Subashini Prabhakar, Chief Technology Manager, Dax Networks, said, "We have deployed an IP-based network in Srei's CSCs in West Bengal, enabling seamless video conferencing and voice and data transfers."
