

Dax Networks launches DX-526 Series

[India Infoline News Service / Mumbai Sep 01, 2009 09:44](#)

Dax Networks, one of the top three Networking companies in India, today announced the launch of the DX-526 Series, a series of Industrial-grade Ethernet Switches which enable rapid network recovery. Priced up to Rs 81000/-, the DX-526 Series is targeted at Automation, Transportation, Semi-conductor and Heavy Industrial factories.

These switches feature in Dax's new range of Networking Access and Connectivity products, introduced to enhance the company's Networking Infrastructure (NI) Solutions portfolio. The DX-526 Series is designed to meet critical network environment standards with IP 30 enclosure and has been tested under extensive Industrial EMI and Safety standards.

The DX-526 Series supports X-Ring and a fast network recovery with a reaction time of under 10 milli seconds over 250 switches. Network recovery protection between X-Ring groups is ensured by Dual and Couple Ring technology. Dual homing is present as a back-up to the X-Ring groups when connecting to upper layer or core switches. The DX-526 Series' relay-contact-to-Alarm system will immediately notify users of Power and/or Port failures by instantly sending an email to pre-defined addresses

The DX-526 Series is a 6-Port 10/100TX + 2-Port 100FX, Multimode / Singlemode Fiber Industrial Switch series with advanced SNMP functionality. These features include MSTP, QinQ, QoS for 4 queues, 801.q VLAN, IGMP snooping and query mode. The switches also have SNTP and SMTP functionality.

The DX-526 Series comes with a 3-year carry-in warranty and online support for customers. Dax plans to market these products through its network of Authorized Dax Solution Providers (ADSPs) and system integrators.
