

Dax Networks Launches DX-2102E-NAS 🇮🇳

A Scalable Storage device ideal for small businesses and SOHOs

Chennai, Tamil Nadu, India, Monday, August 16, 2010 -- (Business Wire India)

Dax Networks, one of the top 3 Networking brands in India, recently launched **DX-2102E-NAS**, a **scalable Network-Attached Storage (NAS) device**. Priced at Rs 43,830/-, DX-2102E-NAS is an ideal storage device for small businesses and SOHOs. DX-2102E-NAS offers features often found in high-end NAS servers and comes with in-built multimedia capabilities.

DX-2102E-NAS has a built-in iSCSI target service, policy-based unauthorized IP blocking, SNMP (Simple Network Management Protocol), remote replication, a Gigabit LAN port, and 3 USB ports (with a built-in auto-copy feature)

The **in-built iSCSI target feature** makes the NAS an ideal solution for backup or storage expansion for Small businesses and SOHOs. This feature allows users to easily create dedicated virtual drives on the NAS for their PCs or existing servers. The iSCSI drives on the NAS can be formatted as file systems and used as local drives. The NAS is populated with **2*1TB HDDs** and is **scalable up to 4TB** depending on the expansion needs of the consumer.

The backup software helps NAS users perform real-time synchronization. The NAS also works well with 3rd party backup software and allows data on the NAS to be backed up securely over the network, to or from another NAS. The integrated one-touch button can be configured to trigger instant data backup from the external USB device to the NAS or the other way round.

DX-2102E-NAS supports **Hard Disk Drive S.M.A.R.T (Self-Monitoring Analysis and Reporting Technology)** for monitoring the hard drive status. Moreover, the NAS is embedded with HHS Technology which supports disk checking and bad blocks scanning.

To prevent the NAS from malicious attacks, the server manager can create an **IP filter policy** to allow, deny, or auto-block the IP address or network domain which attempts to connect to the NAS via SSH/Telnet/HTTP(S)/FTP/samba/AFP.

Multimedia Hub

The **integrated UPnP/ DLNA media server** supports gaming consoles and works well with NFS-supported High-Definition (HD) digital media players, allowing DX-2102E-NAS to act as a multi media station.

The **Surveillance Station** enables you to configure multiple IP-based security cameras simultaneously for real-time monitoring, recording and play back.

DX-2102E-NAS comes with a 3-year warranty and online support for customers. Dax intends to supply the current market requirement of this product through its broad network of Authorized Dax Solution Providers (ADSPs) and system integrators.

About Dax Networks

Part of Apcom Group, Dax Networks is one of the top 3 Networking companies in India. Today, Dax has the widest array of networking products available in India, meeting the "edge to core" needs of all given vertical segments such as Government, Telecom, ISP, Financial Services, Education, Defence, and Corporate segments. Dax's primary focus has been to bring in world-class products to India and provide India-centric solutions that enable domestic firms to save on networking capital expenditure.
