

Dax launches VPN Router

Tuesday, July 26, 2011

Dax Networks has launched DX-2824-IRW, a broadband VPN router, it is priced at Rs. 21,700. DX-2824-IRW is ideal for smart secure managed solutions and it delivers advanced internet access control and network protection against hacker attacks and intrusions, said a press statement. It also supports various VPN functions such as Internet Protocol Security (IPSec), Layer 2 Tunneling Protocol (L2TP), Point-to-Point Tunneling Protocol (PPTP) and VPN failover.

DX-2824-IRW features two 10/100 BASE-TX WAN and four 10/100 BASE-TX LAN onboard Ethernet ports. The two WAN Ethernet ports enable automatic failover, load balancing and network flow distribution based on bandwidth ratio, to optimize the bandwidth utilization. The routers enhanced bandwidth management functionality includes protocol based bandwidth control, time based policing and bi-directional rate limiting in steps of 64 Kbps to 40 Mbps, added the release.

Dax plans to market this product through its network of Authorized Dax Solution Providers (ADSPs) and system integrators.
